

Label/studio

Bad Trip Records and **Mir Recording Station** have always been our label and recording studio.

Settled in the countryside around Reggio Emilia, Italy, this place stimulates creativity thanks to its quiet ambience, which is very energetic as well. The Recording studio is far from the city chaos allowing a full immersion in the composing, recording and production activities.

All the years spent composing and playing music, as well as the various projects that worked in our studio had a fundamental impact in our personal musical growth.

Having all the equipment necessary for recording very good takes without having to sell all the blood away, our studio and label evaluates work/cooperation proposals from other bands.
